

Environment and Energy Policy Statement.

At Greater Anglia, our vision for our environmental and energy strategy is: to deliver environmental best practice by working in partnership with colleagues, customers, communities and wider stakeholders.

To achieve this vision we are committed to:

- Achieving net zero across scope 1-3 non-traction emissions by financial year (FY) 2050/51
- Protecting the environment including the prevention of pollution from our activities
- Continually improving our environmental performance within our management system
- Complying with legal, regulatory and other requirements
- Managing our environmental performance as an integral part of every aspect of our operations
- Providing the resources and information necessary to achieve our goals
- Maximising the environmental benefits from our fleet of new trains
- Working with our supply chain to adopt sustainable procurement principles
- Working with local communities to promote sustainable development and biodiversity enhancement
- Reducing our overall impact on our neighbours

Our key environmental targets are:

- Energy – To reduce our domestic energy use by 2.5% every year
- Waste – Aim to recycle 70% of the waste produced and managed throughout the GA operation while, thriving towards Zero waste to landfill, where possible
- Train Fleet performance – Maintain the operational performance of the fleet as measured as KgCO₂e/Vehicle/KM, below 0.49
- Water – To achieve a 10% reduction in mains water consumption by 2025, based on the 2020/21 data

By continuing to make improvements in each of these areas, and by communicating to colleagues about the role everyone can play, we will continue to reduce Greater Anglia's environment impact, thereby enhancing the sustainability of the region's transport infrastructure. Making Greater Anglia the cleaner greener alternative.

We will report publicly on our performance, and our environmental management systems will continue to be externally audited.

Jamie Burles
Managing Director
